JEFFREY KO

Front-End Developer · React · TypeScript · Next.js

Melbourne, Australia · 0433 940 833 · jefpkos@gmail.com
github.com/jeffreykosasih · jeffreyko.com · linkedin.com/in/jeffreykosasih

PROFILE

Front-end developer with an IT degree, an iOS engineering background, and a design practice behind it. I build and deploy React and Next.js applications in TypeScript, and I have shipped everything on this page myself — design, code and deployment. Comfortable working from a Figma file or from a product conversation, having sat on both sides as a Product Owner.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Swift

Frameworks & libraries: React, Next.js, Three.js, Framer Motion, Tailwind CSS, SwiftUI

Tools & practice: Git and GitHub, Vercel, responsive and accessible (WCAG) UI, Figma, AI-assisted development with Claude Code

PROJECTS

Source at github.com/jeffreykosasih · live builds linked below

Port Jeffrey — 3D interactive portfolio · TypeScript, Three.js, React 2025

- Built an explorable 3D island in the browser where each project is a labelled object in the scene, handling camera control, scene composition and in-world labelling.
- Designed and implemented the whole thing solo, including light and dark display modes. Live at portjeffrey.vercel.app.

jeffreyko.com — Portfolio site · Next.js, TypeScript, React, Framer Motion 2026

- Built and deployed a responsive, animated case-study site on Vercel, with a routed project structure and motion handled in Framer Motion.
- Own the full stack of the site end to end: design system, component structure, build and deployment.

Muscle Memory — Workout tracking app · Next.js, TypeScript 2026

- Minimal workout list application with client-side state, built and deployed to Vercel at musclememo.vercel.app.

Katsu Seiba — Restaurant site concept · React, JavaScript, Tailwind CSS 2026

- Built in React with Tailwind CSS and Framer Motion: menu, locations and table booking, with booking one tap away from every section. Live at katsuseiba.vercel.app.

EXPERIENCE

Delivery Driver & Warehouse Roles — National Distribution Service, Koko Black and Toll, Melbourne 2023 – present

Product Owner — Bank Central Asia Jan – Apr 2022

- Managed the backlog and feature priorities for digital banking products used by millions of customers, including a portal and a data-monetisation project.
- Worked daily with engineering to reconcile customer needs with technical constraints, writing and prioritising the work that went into each release.

Software Engineer Intern — Apple Developer Academy @ UC Feb – Nov 2021

- Product Manager and iOS developer for Readdy, a team app that lets people with dyslexia scan text and read it more easily.
- Designed, built and tested iOS features in SwiftUI to Apple's Human Interface Guidelines, using Challenge Based Learning to take problems from framing to working software.
- Worked across the full delivery cycle, from specification through implementation to release.

EDUCATION & CERTIFICATIONS

Master of Information Technology — Kaplan Business School, Melbourne 2025 – 2026

Bachelor of Information Technology — University of Ciputra, Surabaya 2015 – 2019

IBM: Introduction to Git and GitHub · IBM: Developing Front-End Apps with JavaScript · Google UX Design Certificate
